Carlos Alberto de la Guardia Pirdra

Technology-inclined professional possesses strong troubleshooting capabilities and a customer-oriented attitude. Dedicated and highly skilled Telecommunication Engineer with a strong background in designing, implementing, and maintaining telecommunications systems. Seeking to contribute my expertise in network infrastructure, wireless technologies, and project management to a dynamic organization.

WORK HISTORY

IT Support Specialist and Help Desk

INFOGA, SAN NICOLÁS DE LOS GARZA

In August 2022 I moved to Mexico to study at the Universidad Autónoma de Nuevo León. After a while, I started working at Infoga, an Internet and electronic security service provider, located in Escobedo, Nuevo León.

- Provide remote and on-site support for laptops, PCs, printers, mobile devices, and other equipment.
- · Provide technical support for software or hardware maintenance and installation.
- · Diagnose and troubleshoot wireless network outages.
- Installation and maintenance of CCTV systems.

Specialist in Telematics (Network Management Group)

ETECSA, SANTA CLARA, CUBA

ELECSA, SANTA CLARA, CUBA

In June 2021, a change was made in the organizational structure of the ETECSA Company, so I became a Telematics Specialist in the Network Administration Group. In this new position, in addition to the functions I had previously, I have had to assume new ones:

- Perform the supervision of the technological sites in the specialty of Transmission.
- · Participate in field tests for the introduction of new technologies and certify that they meet the requirements for operation.
- Participate in the identification of vulnerabilities in the telecommunications network, and propose actions to mitigate or eradicate them
- Proficient in the design, installation, and maintenance of telecommunications systems, including voice and data networks.

Specialist in Telematics (Operations Support Group)

ETECSA, SANTA CLARA, CUBA

After completing the period of job training, I held the position of Telematics Specialist, attending the engineering of the Network. In this position I have served:

- Carrying out studies of the different performance indicators of the telecommunications network and proposing actions to
 optimize the physical and logical resources that compose it to improve these indicators.
- Managing the processes of acceptance and start-up of the investments made, according to the protocols and standards of the specialties of Switching, Transmission, Tele-traffic, Access, and Energy
- I have managed to carry out projects that have solved existing service needs in remote rural communities by optimizing the use of equipment.
- Design and implementation of the GPON network in the Cayo Santa María Tourist Pole
- · Design, installation, and maintenance of telecommunications systems, including voice (NGN) and data networks.

Training Technician

ETECSA, SANTA CLARA, CUBA

In this period, I became acquainted with:

- The Operation, Maintenance, and Homologation of Energy and Backup Systems for Telecommunications Equipment.
- The design and installation of Integral Protection Systems for Telecommunications equipment.
- Measurement and analysis of radio signal propagation
- Installation, Operation, Maintenance, and Solution of Faults of Radio-link equipment, mainly from the manufacturers Huawei, Nokia. and Ericsson.
- Characteristics and types of Fiber Optics.
- Installation of Fiber Optic Networks, complying with technical standards.
- · Measurements for Fault Detection in Fiber Optic Networks.
